

E project members and their works

1. Hasfa

Handled complete website styling and alignment, ensuring consistent layout across all pages. Implemented animations, hover effects, and custom styling using various CSS libraries and frameworks. Managed spacing through proper use of margins and paddings. Collaborated with team leads to accurately structure the Home section and align all other sections according to the design and content provided by team members.

2. M.Danish

Collaborated with Danish, who developed the About and Research sections, and contributed alongside him on additional parts of the website. Ensured consistent styling and layout across page responsiveness. Utilized CSS frameworks and libraries for structured design, and maintained accurate implementation of sections based on team inputs.

3. M.Wasi

Wasi was responsible for creating the Services section and the Product page, as well as adding interactive cards in various sections of the website. His work contributed to the overall functionality and visual appeal of the site, ensuring a user-friendly layout and engaging content presentation.

4. Husnain

Husnain developed a pop-up contact box and designed the login/signup page, enhancing the website's interactivity and user engagement. His work ensured smooth user input functionality and contributed to a seamless user experience.
